● Reasons

I have been searching through many lightings that I think would suit the round dining table in the apartment project which looking something like this. Therefore, I wanted to make both light and table relates to each other by selecting the organic shape ceiling light. Another reason why I chose this brass material is because the colour of it is in the same mood and tone as the apartment.

● Light bulb

Reasons

These LED stripes has a warmer tone to it, so it will help to make the mood of the room more relaxing which is good for the apartment. Especially, in the bedroom and the living room.

I wanted this apartment to look minimal but also contemporary, following from the design brief. Therefore, having these LED lights can really help to compliment the brief.

Design Brief

Spatial Requirements

The space of this apartment is for two people and will involve, one bedroom, one and a half bathroom, and one living area where it also include a kitchen. From all these 4 areas, the common area will be the largest, follow by the bed room and then bathrooms. The window will be display where there is a nice view, not too big or small. Preferably, want the door to be larger than normal.

Style Requirements

The overall style, she wanted to be contemporary and minimalist. The room needs to be environmental friendly. She mainly focuses on the storage of this space and how it can look clean even with a lot of stuff. Everything needs to be convenient and easy to use. Moreover, the apartment needs to be dust free as she is allergic to dust. The colour theme, she mentioned that she wants the earth tone, white, colours that doesn't hurt her eyes. For lights, she wants it to be adjustable and also, very dark when sleeping and very light when working. For texture, it would be from the nature, for examples wood, stones etc. The rooms need to be aesthetically pleasing, by this meaning, the objects, decorations and furniture. Lastly for the space and form, she wants so organic lines and shape, also wants to see some empty spaces.

Java Lamp Shade, Extra Large, Natural Rattan

A ceiling light that will be hanging in the bedroom area and will act as an ambient and task light.

MADE

Java (no date) Made.com. Available at: <https://www.made.com/java-lamp-shade-extra-large-natural-rattan> (Accessed: December 2, 2020).

● Reasons

The light has a special texture, which gives a statement look to it. I also chose it in an extra large size to balance out the room, as there is only one ceiling light in the area. I also want it to be bright enough to cover the whole room.

● Light bulb
